

# An Identification Guide To Washington Oregon Northern California Most Common

Exploring the diverse landscapes of the Pacific Northwest and Northern California is an unforgettable experience. From towering mountain ranges to ancient forests, and from rugged coastlines to picturesque valleys, this region offers a wealth of natural wonders waiting to be discovered.

One of the most fascinating aspects of these regions is the incredible abundance of various plant and animal species that call them home. In this identification guide, we will take a closer look at some of the most common and noteworthy flora and fauna found in Washington, Oregon, and Northern California.

## Flora

1. Douglas Fir (*Pseudotsuga menziesii*): The magnificent Douglas Fir is a hallmark of the Pacific Northwest. Its tall stature and pyramid-shaped crown make it easy to spot in the densely forested areas. The trunks of these trees can reach impressive diameters, and their needles emit a distinctive sweet fragrance.

2. Pacific Rhododendron (*Rhododendron macrophyllum*): This stunning flower can be found in the coastal regions of Washington, Oregon, and Northern California. With its large, showy blooms ranging in colors from white to pink and purple, the Pacific Rhododendron adds a vibrant touch to the lush greenery.

3. Redwood (*Sequoia sempervirens*): The majestic Redwood trees are true giants of nature. These towering beauties are prevalent in Northern California, particularly in the coastal areas. Not only are they some of the tallest trees in the world, but their trunks can also grow to colossal sizes.

## **Fauna**

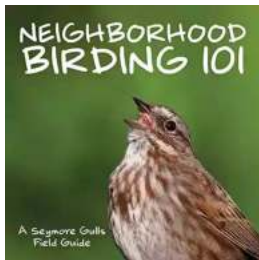

1. American Bald Eagle (*Haliaeetus leucocephalus*): The iconic symbol of the United States, the Bald Eagle, is a common sight in the Pacific Northwest and Northern California. With their distinctive white heads and impressive wingspans, these majestic birds evoke a sense of awe and wonder.

2. Black-tailed Deer (*Odocoileus hemionus*): These elegant creatures roam the forests and meadows of Washington, Oregon, and Northern California. Known for their black-tails and large ears, Black-tailed Deer are graceful and agile, making them a joy to observe in their natural habitats.

3. California Sea Lion (*Zalophus californianus*): Along the rugged coastlines of Northern California, you may catch a glimpse of these playful marine mammals. California Sea Lions are known for their loud barks and their tendency to gather in large colonies, providing an entertaining spectacle for onlookers.

As you venture through the stunning landscapes of Washington, Oregon, and Northern California, keep an eye out for these remarkable species. Whether you're exploring the thick forests, marveling at the towering trees, or admiring the diverse wildlife, this identification guide will help you appreciate the region's natural beauty even more.

Remember to respect and observe these creatures and plants from a safe distance, as they play an essential role in maintaining the delicate balance of these unique ecosystems.

A clear and concise bird guide to West Coast birds. Learn to easily identify 110 of our most common neighborhood birds with 158 beautiful photos and fun, easy-to-understand descriptions.

Early readers are saying:

- “Wow! Thank you so much for creating this. Just what amateurs like myself need!” – Gloria Blaine
- “Thank you, I’m new at this and your ID markers make sense to me!!” – Tina Graham
- “These guides are so darn helpful!” – Linda Glenn-Barham

A bird guide for everyone:

Large photos combined with clear and concise bird descriptions make this book the perfect entry point to learning more about our common neighborhood birds. Each of the 110 bird species found in the book has distinguishing field marks pointed out in addition to some fun facts and observations.

Similar birds are grouped so that it is easy to look back and forth and study their differences.

Neighborhood Birders:

Neighborhood Birding 101 is for you if you want to learn to identify common birds of the West Coast.

When compiling my list of birds I focused on those most frequently sighted west of the Cascade Range from Canada all the way down to Eureka, California.

I focused on birds found in parks, fields, ponds and small wooded neighborhood areas.

This guide will help you identify all the birds that come to your feeders or that you see on your neighborhood walks.

“My young son is eagerly anticipating the book. He has me show him your latest id guides every morning before school.” – Emily Crossen Page

About The Author:

Seymore Gulls is a Portland, Oregon based photographer and birder. He first started birding in January of 2012 and his love for birds and photography has grown ever since.

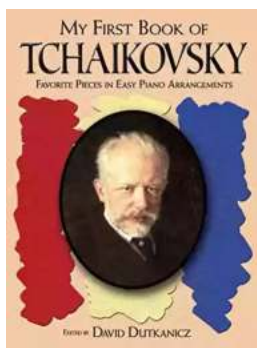

Seymore Gulls loves to teach people about nature and when he isn't birding he leads interpretive kayak tours where he enjoys talking about Oregon's history, and also birding...

He is the proud father of an inside only cat, and husband of an indoor/outdoor wife with whom he loves to go on adventures.
