Print length : 288 pages

Screen Reader : Supported

This guidebook grants readers access to detailed descriptions, stunning photographs, and comprehensive information on habitat, foliage, flowers, and fruits. Dive deep into the expansive taxonomy, which embraces families such as Fabaceae, Rubiaceae, and Melastomataceae, among others. Whether you're interested in medicinal plants, fruits, or timber species, this guide has something to offer for every nature enthusiast.

Unveiling the HTML Format: An Immersive Reading Experience

This exceptional guide stands apart not only for its content but also for its innovative presentation. Delivered in the engaging and visually appealing HTML format, this resource takes the reader on a captivating digital journey. With each scroll and click, you'll be transported deeper into the Amazon rainforest, surrounded by an abundance of rich green hues and breathtaking images.

The HTML format allows for a seamless integration of descriptive keywords, ensuring that readers with visual impairments or those relying on screen readers can also experience the wonders of the Amazon. Every photograph is accompanied by an alt attribute, making it an all-encompassing and accessible resource. Dive into the world of Yacareta, Buriti, or Jarina, and unravel their hidden stories through vivid descriptions and captivating visuals.

Unraveling the Secrets of the Amazon: A Long-Tailed Clickbait Title

To evoke curiosity among readers and encourage deeper exploration of the guide, a long-tailed clickbait title has been carefully crafted for this article.

"Unveiling the Best Kept Secrets: Awe-Inspiring Pictorial Field Guide To The Woody Plants Of The Amazon Vol IX" captures the essence of the guide's purpose while provoking intrigue and igniting a desire for discovery.

This title draws attention to the "best-kept secrets" and positions the guide as an awe-inspiring resource, hinting at the hidden wonders that lie within its pages. By presenting it as a pictorial field guide, we emphasize the visual richness and appeal of the content. The inclusion of "Vol IX" creates a sense of prestige and continuity, suggesting that this guide is part of a cherished series, fueling enthusiasm among avid nature enthusiasts and collectors.

, Pictorial Field Guide To The Woody Plants Of The Amazon Vol IX is a captivating and valuable resource for anyone seeking to deepen their understanding of the Amazon rainforest. With its immersive HTML format, long descriptive keywords for alt attributes, and a long-tailed clickbait title designed to captivate readers, this guidebook unlocks the secrets of the Amazon's botanical wonders like never before. Embark on a journey of discovery and let the mesmerizing beauty of the rainforest enchant you.

Print length : 288 pages

Volume I of A Pictorial Field Guide to the Woody Plants of the Amazon focuses on the fruits of all known Guianan plants covering about one-hundred families, 546 genera, and over 2,000 species. Moreover, the fruits of a few major edible-fruit producing families that occur in the larger Amazon and not in the Guianas are also included, such as a number of Anacardiaceae, Annonaceae, Lecythidaceae, Myristicaceae, and Sapotaceae. This catalogue is restricted to woody plants only, i.e. trees and shrubs reaching over 1.5 m in height when full grown, lianas, vines, (hemi)-epiphytic climbing shrubs, and (sub)-ligneous epiphytes. Volumes II – IX of A Pictorial Field Guide to the Woody Plants of the Amazon treat 114 plant families in alphabetical order. This Flora Neotropica depicts and describes over 1,000 genera and nearly 10,000 species of woody plants that are known to occur in the larger Amazon.. Volume XI covers the families SAPOTACEAE - VOCHYSIACEAE, as follows:

SAPOTACEAE A.L. de Jussieu - 11

SIMAROUBACEAE DC. - 114

SIPARUNACEAE A. DC. Schodde - 123

SMILACACEAE Vent. - 129

SOLANACEAE Juss. - 135

STERCULIACEAE Bartling - 150

STRELITZIACEAE (Schumann) Hutch. - 168

STYRACACEAE Dumort. - 171

SYMPLOCACEAE Desf. - 174

THEACEAE D. Don. - 176

THEOPHRASTACEAE Link. - 180

TILIACEAE Juss. - 182
TRIGONIACEAE Endl. - 191
TURNERACEAE DC. - 193
ULMACEAE Mirbel - 196
VERBENACEAE J.St.-Hil. - 199
VIOLACEAE Batsch. - 212
VISCACEAE Miers - 224
VITACEAE Juss. - 226
VOCHYSIACEAE A. St.-Hil. - 230
INDEX OF ALL PLANT FAMILIES & GENERA TREATED - N° VOL./page(s) - 248
INDEX OF VERNACULAR NAMES USED IN BRAZIL - 257

Each family is headed by a short family description based mainly on the more practicable field characters of leaves, inflorescences, flowers, and fruits. The section Notes includes remarks on habit, secretory systems, and seed dispersal - only when one may generalize on family level. Following a family description, each genus within the family is numbered and mentioned together with the author's name. A genus description is given when more than one species within the genus are described. Each genus is followed by the species in alphabetical order and sub-numbered. This facilitates a quick determination of both the number of genera treated within a certain family and the number of species treated within a certain genus. The species name is followed by the author's name according to up-to-date taxonomic literature, while one or more synonyms may be added in brackets. The species descriptions, as presented in Volumes II-IX, usually include four sections, the first word of each section being printed in italics. The first section gives simple leaf characters as far as they are practicable in the field, using for instance a pair of binoculars. The second section describes main characters of inflorescence, infructescence, (fruiting) calyx, flowering and/or fruiting pedicel. The third section describes, as detailed as possible, external and

internal characters of fruit and seed(s). The fourth section, “Notes”, gives various remarks that may be useful in the field, such as plant habit, presence of secretory systems, bark features, seed dispersal strategy, phenology, occurrence (based on data from literature and samples in the Utrecht Herbarium plant collection), habitat and soil type (data usually taken from labels), and geographical distribution within the Guianas and the larger Amazonian region (data based on the literature and checklists from the respective countries, label information and the internet).
