

# Denying The Comfort Women: Unveiling Historical Truths

## The Painful Reality of Denying The Comfort Women

During World War II, countless atrocities were committed, leaving deep scars on the nations involved. One such tragedy that often goes unacknowledged is the

controversial issue of the comfort women.

The comfort women were young women, including girls as young as 12, who were forced into sexual slavery by the Imperial Japanese Army. These women were taken from their homes and subjected to unimaginable horrors, enduring extreme physical and psychological violence.

Decades later, however, there are some who deny and distort this dark chapter of history, attempting to sweep it under the rug and silence the voices of the survivors. In this article, we will delve into the reasons behind this denial and shed light on the irrefutable evidence that proves the existence of the comfort women system.

### Purposeful Historical Revisionism

The denial of the comfort women issue can be attributed to various factors, including political motivations, nationalistic pride, and the desire to paint a more

favorable image of Japan's war crimes during that period. Some argue that acknowledging the existence of comfort women would tarnish the reputation of the Japanese government and its military.

Moreover, the silence and denial surrounding this issue extend beyond Japan. Other countries involved in World War II also bear responsibility for the exploitation of women. Denial can be a collective effort to escape guilt and avoid taking responsibility for these abhorrent acts.

## **Unveiling Irrefutable Evidence**

Mounting evidence exposes the truth about the comfort women system, dispelling any doubts and falsehoods propagated by deniers. Testimonies from survivors, official military documents, and recorded confessions from former Japanese soldiers all confirm the existence of this extensive and organized system.

In addition, numerous investigations conducted by international organizations, historians, and scholars have uncovered further evidence. These findings offer a glimpse into the dark reality endured by the comfort women and refute any claims that this was merely a fabrication or a product of wartime propaganda.

## **Remembering the Forgotten Victims**

Denying the comfort women not only perpetuates historical injustice but also compounds the suffering of survivors who have already lived through unimaginable trauma. It is imperative that we acknowledge their pain, validate their experiences, and ensure that history never forgets their stories.

By recognizing the existence of the comfort women system, we honor the memory of those who have passed away and pave the way for a more inclusive

and compassionate future. Healing can only begin when truth prevails, and justice is served.

## The Importance of Historical Truth

History plays a fundamental role in shaping society. Acknowledging uncomfortable truths from the past allows us to learn from our mistakes, prevent the repetition of atrocities, and foster a more empathetic and tolerant world.

By denying the comfort women, we risk perpetuating a dangerous cycle of denial and erasure. We owe it to future generations to uncover historical truths and ensure that the voices of the oppressed are heard.

Denying the comfort women is not only an injustice to the survivors but also a disservice to humanity. It is our responsibility to confront and expose the truth, dismantle the walls of denial, and ensure that the stories of these women are never forgotten.

Together, we have the power to break through the darkness of historical revisionism and shed light on the painful reality endured by the comfort women. Let us stand in solidarity with the survivors, advocate for justice, and work towards a more compassionate world, where the horrors of the past are confronted and never repeated.

Planned, instituted and run by the Japanese Imperial Military during the Asia-Pacific War, the 'comfort women' system remains hugely controversial. Although political leaders often contest the role of coercion, many argue that the 'comfort women' were mobilized forcibly, through processes of abduction and deception.

Utilising archival research, court testimonies and eyewitness accounts of both survivors and military and civilian personnel, this book argues its case in three ways. Part I analyses the modalities of coercion employed by the authorities and investigates the historical differences and continuities between licensed peacetime prostitution and wartime sexual slavery. Part II then examines the failures of the Asian Women's Fund to resolve the 'comfort women' issue, whilst Part III explores the removal of 'comfort women' content from school history texts after the late 1990s and details Japan's diplomatic efforts to prevent war victims from suing the post-war state. Presenting a strong argument in opposition to the revisionist school of thought, this book ultimately concludes that a realistic settlement would see a victim-oriented solution that the survivors can accept.

Written by leading Japanese and zainichi Korean scholars, *Denying the Comfort Women* will be of huge interest to students and scholars of modern Japanese studies, gender studies, women's studies and Asian history.
