The Get Calculating series of maths activities is designed to deepen children's mathematical thinking skills in a fun way. They are particularly aimed at children

in Years 5-7 (ages 10-12).

The activities focus on key areas of the Primary National Curriculum and at the same time develop confidence with using calculators. This makes them particularly useful to help Year 6 children get ready for maths at secondary school. Many of the activities can be used by children on their own, but some need a partner, and if possible, it's great for children to share working through them with a parent or carer.

'Race to 30' is a game that requires you to use addition with small numbers to make the total of 30 and no more! You'll need a partner to play with and you'll both need paper, a pen or pencil, and a calculator, which could be an app on a phone.

Further information about the activities, including lesson plans for teachers and certificates, is available on the MEI website.

MEI is a national maths education charity that aims to improve maths education.
