

The Harding Family Method: Preparing Your Child for College at Age Twelve

Is it possible for a twelve-year-old to be ready for college? The Harding family believes so. With their unique approach to education and personal development, they have successfully raised college-ready children by the age of twelve. In this article, we will uncover the secrets of the Harding Family Method and how you can implement their strategies to set your child on the path to academic success.

The Journey to College Readiness Begins at Home

For the Hardings, education is not limited to the confines of a traditional classroom. It starts at birth, with a deep emphasis on early childhood development. From creating a stimulating home environment to encouraging a love for learning, the Hardings believe that the foundation for success is laid during the earliest stages of life.

By exposing children to a variety of experiences, such as music, art, sports, and community service, they develop a well-rounded set of skills and interests that will serve them well throughout their academic journey.

"We believe that by fostering a love for learning and exploring the world around them, children become naturally curious and eager to excel academically," says Mrs. Harding, mother of four.

The Balance between Academic Rigor and Play

When it comes to academics, the Harding family strikes a delicate balance between rigorous study and hands-on learning experiences. They believe that education should be both challenging and enjoyable, and that finding the right balance is crucial.

By incorporating playful elements into their children's education, such as educational games, field trips, and interactive projects, the Hardings ensure that their kids stay engaged and motivated to learn. This approach not only makes learning fun but also strengthens their problem-solving and critical-thinking skills.

Building Character and Leadership Skills

Preparing a child for college is not just about academic excellence; it's also about building character and leadership skills. The Harding family places great importance on teaching their children values such as integrity, empathy, and responsibility.

Through extracurricular activities, such as volunteering, participating in clubs, and taking on leadership roles, the Hardings' children develop important life skills. These experiences not only enhance their college applications but also shape

them into well-rounded individuals who can contribute positively to any community.

The Role of Parental Guidance and Support

The Harding family firmly believes that the role of parents is crucial in preparing their children for college. However, they emphasize the importance of guiding rather than dictating their children's education.

Parents play a pivotal role as mentors, providing guidance, encouragement, and support throughout the journey. By nurturing their child's strengths and interests, helping them set goals, and exposing them to various opportunities, parents can empower their children to take ownership of their education and future.

The Results: College Ready at Age Twelve

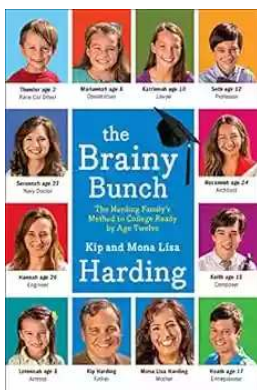

So, what are the outcomes of implementing the Harding Family Method? The Harding children have consistently demonstrated exceptional academic performance, excelling in both standardized tests and coursework. Their intellectual curiosity, problem-solving abilities, and leadership skills make them stand out from their peers.

"We are proud to have raised children who not only have a thirst for knowledge but also possess the necessary skills to thrive in college," says Mr. Harding, father of four.

By following the Harding Family Method, you can set your child on a path to college readiness by the age of twelve. Remember, education is not limited to the classroom; it starts at home. By fostering a love for learning, balancing academic rigor with play, building character, and providing parental guidance and support,

you can empower your child to achieve academic excellence and personal growth.

While the Harding Family Method may not be suitable for everyone, it serves as an inspiration for parents who aspire to prepare their children for college at an early age. By adopting some of their strategies and tailoring them to your child's specific needs and interests, you can create a solid foundation for their future success. Remember, it's never too early to invest in your child's education.

“A straightforward, practical guide that takes an anyone-can-do-this approach” (Kirkus Reviews), The Brainy Bunch outlines the Harding family’s well-rounded method for producing college-ready kids by age twelve.

Having six out of ten kids go to college is no small feat on its own, but having six kids in college before their teens—that’s nothing short of incredible. “Never judgmental and not without humor,” this “fascinating read” (Library Journal) is Kip and Mona Lisa Harding’s story of producing exactly those extraordinary results.

Kip and Mona Lisa are parents to an engineer (who earned her BS in mathematics at seventeen), an architect (who became the youngest member of the American Institute of Architects), a Navy physician (who earned her biology degree at seventeen), an entrepreneur (who earned an MS in computer science at seventeen), a sixteen-year-old college senior studying music theory and performance, a thirteen-year-old Middle Ages scholar with the highest average in his college class, and four others who are following fast in their siblings' footsteps! No wonder the family is so used to being asked: How did you do it?

In an "impressive" (Publishers Weekly), down-to-earth narrative, Kip and Mona Lisa reveal with warmth and humility the strategies behind their family's amazing educational accomplishments. Filled with daily regimens, advice for providing children with fulfilling experiences that go beyond the home, and tips for making the transition to college, theirs is an inspirational real-life success story that anyone can achieve—whether you homeschool your children or not.

Featured on the Today show and FOX, The Brainy Bunch is uplifting and ultimately relatable proof of what any family can accomplish through dedication, love, faith, and hard work.
