## Unlocking the Potential of Problem-Based Learning

With the Problem-Based Approach, the traditional classroom dynamic is revolutionized. Rather than relying solely on lectures and textbooks, students

actively engage with complex, real-world legal problems. Through collaborative discussions, research, and analysis, students gain a deeper understanding of the principles and applications of education law.

One of the key advantages of problem-based learning is its ability to bridge the gap between theory and practice. By applying legal principles to authentic scenarios, students develop the skills necessary to navigate the complex landscape of education law. This not only enhances their understanding but also prepares them to address real-life legal challenges in the field.

## **The Benefits of Problem-Based Learning**

Why should educators and students embrace this approach? The answer lies in the numerous benefits it offers:

### **1. Active Learning:**

Problem-based learning encourages students to actively participate in the learning process. Rather than being passive recipients of information, students become critical thinkers, problem solvers, and effective communicators. This active engagement leads to a deeper understanding and application of education law principles.

### **2. Critical Thinking and Problem-Solving Skills:**

Through the Problem-Based Approach, students develop essential critical thinking and problem-solving skills. They learn to analyze complex legal issues, evaluate multiple perspectives, and propose practical solutions. These skills are invaluable not only in the field of education law but also in their future careers.

### **3. Collaboration and Communication:**

Problem-based learning fosters collaboration and communication among students. By working together in groups, they learn to effectively communicate their ideas, debate different viewpoints, and find common ground. These interpersonal skills are essential for success in any professional setting.

#### **4. Real-World Application:**

Education law is not confined to textbooks. It is a living, breathing field that constantly evolves alongside our society. Problem-based learning allows students to apply legal principles to real-world situations, preparing them to face the challenges of the legal profession with confidence.

Education Law: A Problem-Based Approach offers a problem-based approach to teaching education law. The book covers both the standard education law topics and cutting-edge topics such as online student speech, discipline for off-campus behavior, cyber-bullying, physical restraints, protections for LGBT students, vaccination requirements, and charter school requirements. The book provides a

guided, hands-on approach that includes activities that provide students with an opportunity to go outside of the text and gather information about how certain aspects of education law work in "the real world" and in their own states.

This innovative text starts with an introductory and foundational chapter and then proceeds to cover each topic through a problem-based approach. Each chapter provides problems with legal standards from statutes, regulations, and court decisions that allow students to apply the relevant law and focus on resolving real and relevant problems.

The fourth edition of the book includes a variety of updates throughout the book.

Topics covered include:

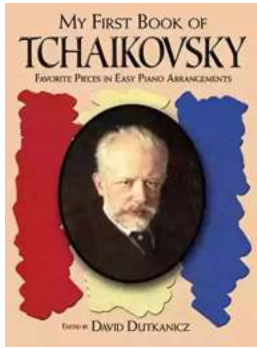

- Foundational principles (including sources of law, the hierarchy of laws involved in education, and how state and federal law interact);
- School funding (focusing on New Hampshire's school funding litigation as an example of issues);
- Employment issues (including licensing, collective bargaining, removal, dismissal, non-renewal, due process, and Free Speech rights in employment);
- Instruction and curricular issues (including ESSA requirements, English Language Learner (ELL) requirements, and academic freedom);
- Attendance, assignment, and placement (including compulsory attendance, considering race in school assignments, vaccination requirements, and home-schooling issues);
- School liability (including torts, Section 1983, Title IX, and online liability);

- Privacy rights and right to know (including FERPA);
- Student discipline (including corporal punishment, discipline for off-campus conduct, and zero tolerance policies);
- Student expression (updated to provide an even more comprehensive review of the requirements in this area, including a CALI lesson that is aligned with the material);
- Search, seizure, and interrogation (including requirements for school resource officers and the requirements for random, suspicionless searches);
- Religion (including Establishment Clause, Free Exercise Clause, and Equal Access Act issues); and
- Special education requirements (including the special education process, updated to include FAPE requirements under Endrew F., discipline, and attorney's fees).
